**TO CIVIL AUTHORITIES: The bearer has responsibilities for or related to the operation of Exelon Generation's nuclear power plants. Your assistance in permitting the bearer to perform his or her duties is appreciated.**

March 21, 2020

To Whom it May Concern:

Exelon Generation Company, LLC owns and operates nuclear power plants in Illinois, Maryland, New York, and Pennsylvania and a shutdown nuclear plant ("TMI") in Pennsylvania.<sup>1</sup> These nuclear power plants provide safe and reliable electricity to local communities and the bulk electric system. Although TMI no longer generates electricity, under federal law, it must be maintained in a safe shutdown status, which requires around the clock onsite security, monitoring, and support.

Due to the evolving COVID-19 pandemic, state Governors and other elected officials have ordered statewide business closings of all "non-essential" or "non-life sustaining" businesses and services in the states where Exelon Generation's nuclear power plants are located or in which its employees and contractors reside, as well as in adjacent areas. The orders provide exceptions for "essential" or "life sustaining" businesses and services, such as electric power generation. These exceptions allow work at electric power generation facilities to continue. Work at Exelon Generation's nuclear power plants must continue uninterrupted in order to provide safe and reliable electricity to the public and the bulk electric system during this crisis.

By extension, companies and contractors that provide materials and services to Exelon Generation's nuclear power plants are an essential part of the provision of electricity to the bulk electric system. The work of these companies and contractors is essential and must also continue to enable Exelon Generation to serve the public and meet its commitment to the bulk electric system.

We understand that governmental officials, including law enforcement, may question your ability to continue working. Please present this letter and your work identification.

Sincerely,

A handwritten signature in black ink, appearing to be "BA" followed by a wavy line.
